

# The CHANCEN eG Mentorship Program

**"I've wanted to find someone who can give me advice and a second opinion for a long time. I can also imagine very well being a mentor myself later on; teaching knowledge is a good way to also continue learning yourself."**

James, about the Mentorship Program

## The vision behind the Mentorship Program

Our vision for this programme is to create a safe space for mutual exchange and discussion. In this space, open questions are to be clarified, tips & tricks for further studies are to be exchanged and individual goals are to be set. Support for entering the job market or helpful networking methods could also be relevant topics.

## Would you like to have a mentor at your side?

### **About the program:**

We want to support our students and members in the exchange of ideas, advice and important information during your studies and further education, offering you input for your personal and professional development.

The program is structured in such a way that you will be assigned a mentor to whom you can turn for questions and suggestions. How you structure your exchange and what support your mentor should offer you will be discussed individually and adapted to your own schedule. There will be regular meetings (possibly online) with your mentor as well as other mentor tandems and us, where you can share your experiences and get input.

## Would you like to support others entering their professional life?

### **About the tasks as a mentor:**

As a mentor for an ISA student, you are the contact person, advisor and inspiration for one or more members who have not yet been able to start their professional life. How you structure your exchange and what support you want to offer as a mentor can be discussed individually and adapted to your own schedule. The tasks include participating in regular (online) meetings with your mentee(s) and other mentor tandems and us, where you can share your experiences and get input.

## Do you want a mentor?

Take part in our mentorship programme and make the transition from education and training to working life easier with the help of your personal mentor!
